

Job Description

The Global Credit & Special Situations (GCSS) Finance team is part of the CFO organization. The primary focus of our team is to support the GCSS Trading business through the implementation and execution of key control processes including legal financial books and records, valuations control, regulatory matters, forecasting, P&L explain, and balance sheet analysis.

The GCSS business is comprised of three individual global businesses: Distressed, Structured, and Credit Flow. The desk trades in a range of products including Loans, Bonds, Equities, CDS, Trade Claims, Index Options & Index Tranches.

Our business partners include the GCSS Front Office, Middle Office and Operations, Enterprise Capital Management (ECM) and SEC/Regulatory reporting. Key priorities for our team include proactive execution of controls, accurate reporting and analysis of financial results and forging strong relationships with business partners to assist in decision making.

Areas of responsibility include:

- Conduct pricing and valuation on distressed credit portfolio
- Review company financials, compare to market peers, build financial models to determine the value of a debt or equity
- Discuss with traders and managers on pricing of a position and resolve pricing discrepancies
- Present the pricing result to senior manager and auditors
- Sector analysis
- Management reporting and analysis
- Process analysis, documentation of policies and procedures and evidencing of results are also of primary importance in this role. Trading desk support is another critical requirement.

Throughout the tenure of the role, the teammate should gain exposure and acumen in the Global Markets/FICC area of the organization and develop or improve knowledge of various asset classes including loans, bonds and equities. Industry knowledge is important including Distressed assets, Aviation, Shipping, and CRE and the following skills: GAAP (with a focus on Fixed Income), Management and Regulatory/SEC reporting, as well as written and oral communication skills. The team is composed of approximately 48 employees located in New York and London.

This position is posted as an SFA but is flexible to be filled as an IFA if the posted qualifications are met by a strong IFA level applicant.

Enterprise Role Overview:

Responsible for more complex finance activities involving implementation of strategic plans, profitability analysis, forecasting and financial reporting for a business unit or associate area. Supports achievement of business goals by working on more complex activities or projects with others within the unit and with partners. Leads projects and coordinates resources. May provide supervision to a small staff. Can manage partner relationships.

Required Skills
